Subject RE: Proposed Amendments Regarding Electronic Discovery

Ken-

Truly an excellent letter! I hope the discovery rules committee is open-minded and paying attention. If they are, this letter will certainly have an impact on them.

As an aside, the fact that the letter itself has a solely electronic existence, which you highlighted to advantage, resonates as a compelling "message within the message." Interesting! (Now if we can just figure out how to get the letter to jump out of the computer monitor and knock some common sense into the committee, we'll be fine ...)

One question: I can think of several people I would like to forward this letter to. Is there any reason not to do that while the committee is deliberating its proposals? I couldn't see a reason, but I thought it prudent to check before pulling the trigger on further distribution of the letter.

Again, great job! Thanks.

David
